7440-125	Quadplex 100mm duct Seal Kit	100mm OD	each	

PRODUCT DESCRIPTION

Kwikie™ Blank Duct Plugs are a universal sealing device that can be applied to any conduit that fits within their expansion range. Their purpose is to prevent the incursion of water and sedimentation while also confining potential problems like dangerous vapors to their source. The plugs have been used in the field to seal Schedule 40 PVC, Schedule 80 PVC, HDPE Innerduct, EMT conduit and corrugated duct. These conduit caps have been deployed for a variety of other uses as well.

Kwikie™ Blank Duct Plugs are manufactured from a combination of high-impact plastic components and pliable, yet durable gaskets. These mechanical duct plugs prevent the incursion of water and sedimentation into costly duct banks and raceway systems while also confining potential problems like dangerous vapors to their source. Each conduit plug features a rope-tie to secure pull-rope to the plug's back-compression plate. By attaching the rope to the back-compression plate, excess slack is readily at-hand for future use. Easily installed, or removed, they provide a simple and highly effective sealing solution.

KEY FEATURES:

- All plastic construction - corrosion proof.
- Water and air resistant.
- Simple installation.
- Ideal for manholes and building entrances.
- Universal sealing device.
- Used in PVC, HDPE, EMT and Corrugated Duct.
