

ASSETPRO™

Smart protection for critical infrastructure

Smart Protection Plates – engineered to shield high-value underground assets from third-party damage.

Proven Alternative – replaces heavy, labour-intensive concrete slabs with a faster, safer, and more sustainable solution.

Versatile Applications – trusted across Gas, Power, Rail, Data Centres, Telco, and Water Utility projects.

Lightweight & Easy to Install – reduces handling risks and accelerates project timelines.

High Visibility & Colour-coded – tailored plate colours to differentiate service type (gas, power, water, telco, etc.).

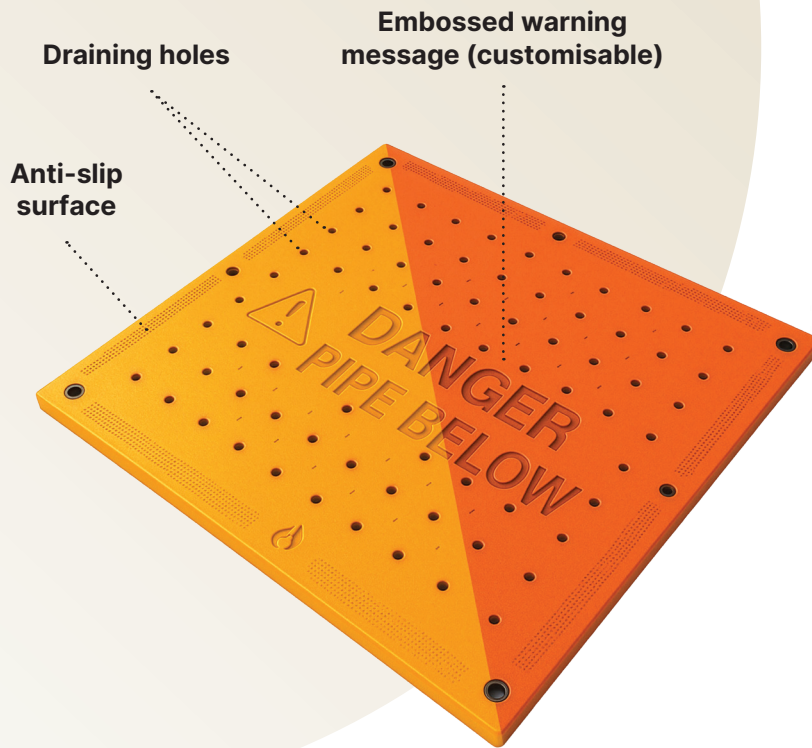

Customisable Options – available with integrated RFID technology for smart asset tracking.

Global Expertise – backed by international adoption (Overpipe, France) and delivered locally by Tapex Industrial Dig Safe.
